

10 July 2019

Ingrid Dillo, Deputy Director at DANS and FAIRsFAIR Project Coordinator, gave an overview of the FAIRsFAIR project during the EOSC Executive Board[1] (EB) meeting on 24 May 2019.

Ingrid presented FAIRsFAIR plans on integrating and syncronising the bigger EOSC-project environment and the EOSC EB working groups. **The EB members expressed their support to this level of actively seeking integration and suggested that FAIRSFAIR could serve as an example to all EOSC-projects to ensure convergence of planning and positioning.** The slides that Ingrid presented are available here

© Copyright 2020 – FAIRsFAIR "Fostering FAIR Data Practices In Europe" has received funding from the European Union's Horizon 2020 project call H2020-INFRAEOSC-2018-2020 Grant agreement 831558. The content of this document does not represent the opinion of the European Union, and the European Union is not responsible for any use that might be made of such content.

Karel Luyben, Chairman of the EOSC, pointed out that "*Ingrid's presentation about FAIRsFAIR was very clear, paying particular attention on the interaction with the development of the EOSC by the EB. The presentation was in line with the workplan and, therefore, very well received. The EB agreed that it would be good for other projects to emulate the model of the "Synchronisation Force". Having reports like this in our meetings was seen as an enrichment by the EOSC EB*".

The FAIRsFAIR Synchronisation Force is the body in charge of providing the FAIRsFAIR General Assembly, Executive Committee and Project Coordination Office with appropriate coordination and interaction with all FAIRsFAIR main stakeholders, namely its European Group of FAIR Champions (EGFC) and the five ESFRI Clusters (PANOSC, SSHOC, ENVRI-FAIR, ESCAPE and EOSC-Life), as well as the thematic and regional EOSC projects ('5b'): SYNERGY, NORDIC, EOSC-PILLAR, NI4OS-EUROPE, EXPANDS. The Force will organize three focused workshops, for developing and tracking an effective uptake strategy to facilitate adoption of FAIR, while ensuring synchronisation with other initiatives, projects and the EOSC governance. Each workshop will have a dedicated report that will serve as input for a White Paper on FAIR data.
