Date:
04 September 2019 to 05 September 2019

EOSC-Life

In the perspective of the launch of the European Open Science Cloud (EOSC) several initiatives and projects have been funded to contribute to the implementation phases and address several aspects of EOSC, as the Governance, the architecture of services, rules of participation etc. FAIR data is a crucial element of EOSC and recommendations for the implementation of FAIR data principles have been recently published . However clear policies are still needed for the management (storage, processing, access, sharing and reuse) of sensitive data, in particular health and personal data.

ECRIN co-organised the 'FAIR Enough' meeting in Brussels from 4 - 5 September 2019 as part of the EOSC-Life project. The goal is to align partner strategies and project initiatives regarding FAIR data and related issues.The objective of the workshop is to bring together the main ongoing projects tackling FAIR data & data protection issues to have an overview of the respective objectives and achievements, identify potential gaps and synergies to outline a common strategy for the development of guidance and services to handle sensitive research data.

FAIRsFAIR was invited to join the workshop together representatives of EOSC-Hub, EOSC-Life, ENVRIFAIR, FAIR4HEALTH, FAIRPlus, GoFAIR, PanOSC, and SSHOC.

FAIR ENOUGH?
Policies and Recommendations for the Processing of Sensitive Data
Brussels, 4-5 September, 2019
Meeting venue: Belgian Cancer Registry, Koningsstraat 215 box 7, 1210 Brussels
