Terminologies for ENVRIs: why, what and how

The course will give a good introduction into ontologies and how these can help “putting the I into FAIR”. Participants will understand key concepts of the Semantic Web and knowledge representation techniques and see different examples of ontology & vocabulary portals. The course will cover all ENVRI-FAIR sub-domains (atmosphere, marine, solid earth, and terrestrial ecosystem/biodiversity).

Target Groups:
Data center staff (IT people with good grasp of metadata as such, but much less knowledge of ontologies, linked open data, vocabularies etc.)

Deadline:
To attend the training, please sign up by **19th January 2020**
