

14 April 2020

The FAIR Data Maturity Model is now ready for review. The model, which proposes the set of indicators, priorities and maturity levels for the evaluation of FAIRness on a general level, reflects significant input from FAIRsFAIR, including at a joint session during the EOSC Symposium 2019. Also, FAIRsFAIR partners such as DANS, the University of Bremen, the UK Data Archive and DCC have become active members of the FAIR Data Maturity Model WG.

As part of the process to propose an RDA Recommendation in mid-2020, the RDA FAIR Data Maturity Model Working Group has announced the public comment period for the FAIR Data Maturity Model specification and guidelines. The document is available for public review until 13 May 2020.

The full text of the announcement from the FAIR Data Maturity Model WG appears here.
