

Date:
26 May 2020 to 27 May 2020
Location:
Virtual

FAIRsFAIR is organising two workshops to gather input on the findings from an investigation into persistent identifier usage and semantic interoperability across European data infrastructures.

The findings are based on a review of projects and landmarks listed by the European Strategy Forum on Research Infrastructures (ESFRI) and various Research Data Alliance (RDA) groups and reveal a multiplicity of technical solutions and wide variation both within and between scientific domains. The report D2.1 Report on FAIR requirements for persistence and interoperability 2019 has been available for perusal and comments. Further feedback is now sought with a view to crystallising the recommendations for the next report.

- **Workshop 1 - 26 May at 10:00-11:30 CEST**: **INVITATION ONLY**, namely the survey respondents that were willing to be contacted again.
- **Workshop 2** - **27 May at 13:30 - 15:00 CEST**: **OPEN TO ALL** interested participants e.g. research support staff, repository staff, research infrastructure staff, researchers, policy makers etc.

Pre-reading

- D2.1 Report on FAIR requirements for persistence and interoperability 2019
- Webinar: Persistence and interoperability in FAIR research data management (10.2.2020)

Note: It is not necessary to read the whole report in advance to participate in this workshop, but some preparation will make participation more fruitful.
