Date:
01 December 2020 to 17 December 2020
Location:
Virtual

FAIRsFAIR will be showcased at AGU Fall 2020, one of the world's largest virtual scientific conferences, scheduled from 1-17 December.

The FAIRsFAIR presentation will take place on 16 December during the lightning talk session at 17:30 CET.

Open data and data management policies that call for long-term access and preservation of data are becoming more and more commonplace in the global research community. In consequence, the need for trustworthy data repositories to preserve and disseminate data is growing. Researchers in the Global South need access to trustworthy digital repositories to make their data accessible, and relevant policymakers at the funder, publisher and organisational levels need to be aware of how their current policies support or hinder data FAIRness.

An important role for trustworthy repositories is the long-term stewardship of FAIR data objects, including curation activities to ensure data objects remain FAIR over time.

Helping repositories progress towards becoming more FAIR-enabling and trustworthy is at the heart of the FAIRsFAIR project. Our presentation video explains exactly how we get this done!
