

F-UJI Automated FAIR Data Assessment Tool

FAIRsFAIR has developed F-UJI, a service based on REST, and is piloting a programmatic assessment of the FAIRness of research datasets in five trustworthy data repositories.

The F-UJI assessment is based on **16 out of 17 core FAIR object assessment metrics** developed within FAIRsFAIR and each corresponding to a part or the whole of a FAIR principle. F-UJI adheres to existing web standards and <u>PID resolution services best practices</u> and utilises external registries and resources such as re3data¹ and Datacite² APIs, SPDX License List³, RDA Metadata Standards Catalog⁴, and Linked Open Vocabularies (LOV)⁵ For information on the practical tests implemented against the metrics, see <u>Devaraju</u>, <u>Huber</u>, et al., 2020.

The source code is now available with a free license through Github. Any feedback on improving the tool and associated metrics can be added as an issue on Github.

To test the F-UJI online test service please visit the new web demo client

For more details on the tool, please contact Robert Huber

Pilot	Certification	Subject	Repository
Repository		Areas	Representatives

	1		T
	CoreTrustSeal	Earth and Environmental Science	Uwe Schindler
	WDS Regular Member		Michael Diepenbroek
			Yuri Carrer
PHAIDRA DIGITAL COLLECTIONS	CoreTrustSeal	Cultural Heritage	Cristiana Bettella
			GianLuca Drago
			Giulio Turetta
			Mikaela Lawrence
CSIRO	CoreTrustSeal	Multiple disciplines	Dominic Hogan
			Cynthia Love
	CoreTrustSeal		Andrej Fast
✓ •WDC	WDS Regular	Earth System Science	Amandine Kaiser
CLIMATE	Member		Hannes Thiemann
			Philipp Conzett (Uit/DataverseNO)
8 DataverseNO	CoreTrustSeal	Multiple disciplines	Gustavo Durand (Harvard/Dataverse)
			Julian Gautier (Harvard/Dataverse)
. 0 -			Laura Huis in 't Veld
Data verse <i>NL</i>	-	Multiple disciplines	Marion Wittenberg
			Paul Boon
