FAIRsFAIR is one of the Horizon 2020 projects for the implementation of the European Open Science Cloud (EOSC). Its goal is to supply practical solutions for the use of the FAIR data principles throughout the research data life cycle and to foster FAIR data culture and the uptake of good practices in making data FAIR. Following the firm thumbs up for the 22-member project consortium received a the recent project review, in the coming weeks and months, efforts to broaden and deepen the impact of FAIRsFAIR both within and beyond established networks will be considerably intensified. Plans include active engagement with the newly formed EOSC Association, a series of national roadshows across Europe, and events for university audiences. Connections with the data science profession will also be strengthened through the soon-to-be-opened FAIRsFAIR Competence Centre.

Join us on Tuesday, 13th April for the FAIRsFAIR 2021 Public Workshop!

An overview of our key stakeholder and community outputs and solutions for FAIR uptake will be showcased.

The event is part of the FAIRsFAIR 2021 week where there are many other opportunities to join FAIRsFAIR at work. **Discover the list of events and register here.**
