

Date:
20 September 2021 to 23 September 2021
Location:
Virtual

OSFair2021 is organized as an emblematic initiative of OpenAIRE, co-organized by key international initiatives in the area of Open Science: COAR, EIFL, Force11, LA Referencia, LIBER, OPERAS, Sparc, Sparc Europe. OS Fair 2021 aims to bring together and empower open science communities and services; to identify common practices related to open science; to see what are the best synergies to deliver and operate services that work for many; and to bring experiences from all around the world and learn from each other

Open science (also referred to as open scholarship) is at a crossroads. Implementation and adoption are progressing, with researchers, research institutions, funding agencies, service providers and infrastructures all engaging at various levels. However, different models are emerging which produce a seemingly fragmented ecosystem and achieve small steps on top of traditional scholarly communication system. In order to enable international and interdisciplinary research, we need to ensure interoperability across communities and services while still maintaining our ability to support diversity of workflows and knowledge systems.

FAIRsFAIR Participation at the event

20 September

- Workshop: Learning Lessons from FAIR data implementation. Good practices from universities accross Europe - 16:30-18:00 CEST (WP7) (read the blogpost)

21 September

- Workshop: The RDM training & support catalogue landscape - 09:30 - 11:00 CEST (WP6) (Recording)
- Workshop: Speaking FAIR implementation: moving from recommendations to supporting practical implementation by service providers - 09:30 - 11:00 CEST (WP2, organised jointly with NI4OS)
- Demo: Facilitating FAIR Awareness Training - 18:00 - 18:30 CEST (WP4)
