Date:
04 November 2021
Location:
Virtual

In this webinar, the panelists provide their experiences with the tests they have used to evaluate the FAIRness of their metadata, the measures they took to improve their FAIRness score, and recommendations to others who would like to improve their score using FAIRness evaluation tests. The presentations will be followed by a Q&A session.

Improving the FAIRness of metadata holdings and scoring sufficiently high in FAIRness evaluation tests becomes more and more critical. So far, not all Service Providers have worked with such tests (as, for example, the F-UJI test, or the Wilkinson's FAIR test, etc.) but are eager to learn more about it.

FAIRsFAIR contribution

The FAIR-Aware toll will be presented at the webinar. It is an online tool which helps researchers and data managers assess how much they know about the requirements for making datasets findable, accessible, interoperable, and reusable (FAIR) before uploading them into a data repository.

This event starts on November 04 at 10:00 CET. Registration is available for CESSDA members and partners only. More info here
