

Date:
13 January 2022
Location:
Online

The meeting is co-organised by **FAIRsFAIR, SSHOC and EOSC-Nordic**. All of these projects have offered support to repositories who are seeking certification as a TDR, and are seeking to sustain the efforts. These initial groups of support providers and receivers could provide the seed for the initial establishment of such a community and could be a starting point in facilitating a European network of FAIR-enabling TDRs.

The goal of this workshop is to **explore ideas and needs** around the creation of a **European network of FAIR-enabling Trustworthy Digital Repositories (TDRs)** and identify steps to progress towards it. By design this workshop has a European angle, but in later stages similar community networking efforts should be considered as well.

This workshop welcomes support providers and receivers from FAIRsFAIR, SSHOC and EOSC-Nordic as well as existing European CoreTrustSeal certified repositories. In addition, EOSC TF long-term data preservation co-chairs and European Commission DG Research and Innovation representatives are invited.

The event is by invitation only
