## How FAIR is Research in Europe today?

A key challenge for FAIRsFAIR is to ensure that project activities dovetail with work carried out by the Working Groups (WG) of the EOSC Governance, and feed into and complement the work that is being done by other projects in the research data and FAIR space.

For this reason, the FAIRsFAIR project set up the Synchronisation Force, a team tasked with establishing a dialogue among the various projects and actors in both the EOSC and FAIR ecosystems.

**The FAIRsFAIR Synchronisation Force is organising its second meeting as a series of virtual workshop sessions from 29 April to 11 June 2020**

Interview with Susanna-Assunta Sansone (Data Readiness Group - University of Oxford) - FAIRsFAIR Champion
