Open Science Partnerships

Focus on

Three pillars

OpenAIRE

Skills and training

Skills

“Hard” skills:

- computational skills (e.g. version control, programming)
- data management skills (e.g. UNIX Shell)
- reproducibility skills (workflows)
- interoperability (standards, protocols)

“Soft” skills:

- open research / Open Science (e.g. licenses, repos)
- Data Management Plans
- ethical perspectives
- learning theories
- leadership

Awareness raising

workshops

meetings

- **Monthly** Workshops (in collaboration with Cyprus)
- Landscape **Reviews**
- **Feedback** forms to gauge interest on Open Science and RDM issues

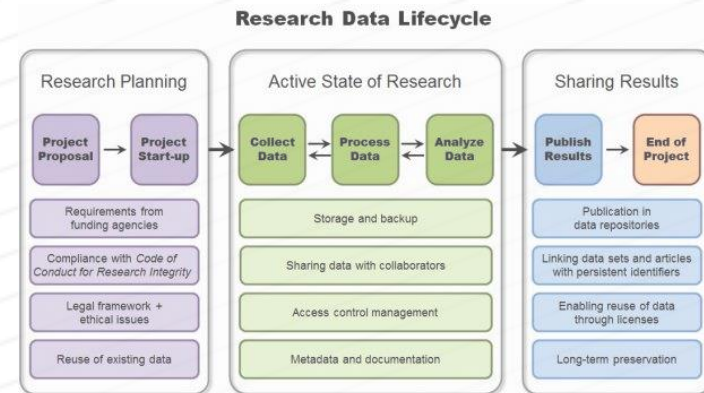

**HorizonEurope
EOSC**

Capacity building

train-the-trainer

Upskilling and re-skilling

- **Academic librarians**

Open and FAIR research data management and curation & resources

- **Service providers**

FAIR implementation

- **Researchers**

Best practices & tools

Collaborations

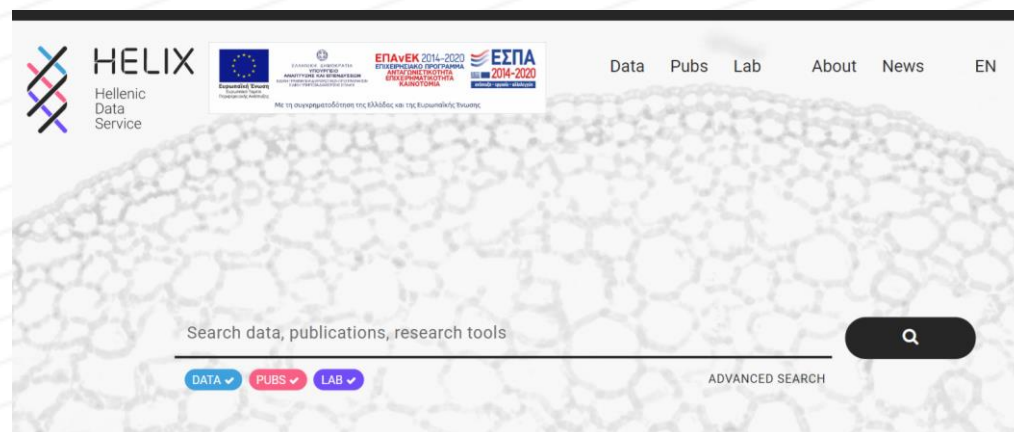

EOSC-related projects

- Training on data deposit and analysis
- Links with EOSC – national implementation

Services for Open and FAIR RDM

Interlinked with other national infrastructures

<https://hellenicdataservice.gr/main/>

<https://ni4os.eu/>

- Coordinates community building activities of regional partners
- Supports services onboarding to EOSC

National policy and support actions for research data skills - impact and experiences

Open Science community

Ministries

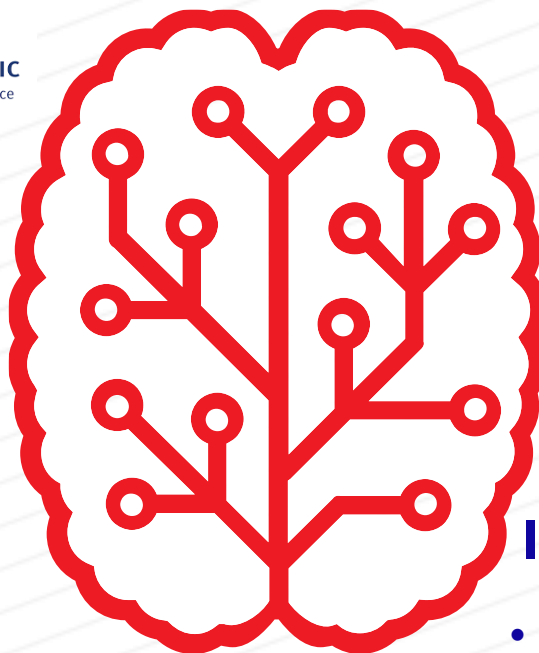

- Open Science
- EOSC

Libraries

- Open Access
- Literature & Data repositories

Academic Networks

- Hardware and networks routers, switches, access points, bandwidth
- Computing HPC, cloud computing

Research Infrastructures

ESFRI

- Domain specific Data Management services

Initiatives

- Open Source and Free Software

National policy and support actions for research data skills - impact and experiences

Connections at the national level

Proposal for a National Open Science Plan

Representatives from **25** research and academic, national nodes and initiatives for Open Science

Policy

The policy aims to strengthen the Greek R&D community with the necessary qualifications, digital skills, incentives and reward mechanisms for the smooth transition of the country to a sustainable Open Science environment, in accordance with the good practices of Responsible Research and Innovation.

- ...n Science Support Office to assist providers of repositories/journals, as experts for the coordination, al use of resources.
- ...ining programmes for the Greek Research Data Management and ment and Management, as well as nce principles throughout the life cycle of scientific projects.
- Functional integration of principles, methods and collaborative practices of Open Science into **undergraduate** and **postgraduate** courses throughout Higher Education.
 - Strengthening and expanding the role of existing **support structures** of academic and research organisations for the continuous support of research teams and infrastructures in the full life cycle of Open Science.
