# Certified Digital Preservation: Practical tips for repositories on aligning with CoreTrustSeal in their Digital Preservation policies

November 4<sup>th</sup> 2021

## Summing up

- Digital preservation is a core function of all repositories (certified or not) and crucial for keeping data FAIR over time
- Trustworthy repositories need to be able to demonstrate a commitment and practical plan for preserving access to data for the long term
- Using some of the free tools available can help you to come up with a digital preservation plan or policy - no need to start from scratch!
- Writing a digital preservation plan and/or policy requires a lot of different people to get involved

# Thank you!
